Design and Features

Born in 2010 from the will of Romeo Sozzi to celebrate the hedonistic sharing of conviviality, Bacco is a cabinet-bar with two souls: if closed it reveals the shape and finishes in wood, once opened it reveals a rich interior accessorized with shelves and cup holders in leather, bevelled mirrors and LED lighting, which make it - as well as functional - highly scenographic.

Bacco has a wooden structure, with base, profiles and handles in bronze. It is available with a TV set-up.
