Elegant and monumental

Bassano is an impressive wooden dining table, preciously finished, it has a circular or rectangular shape.

It rests on a bronze base and is available with an inlaid top with squares or lines.

The Bassano dining table is part of a large family of tables, Promemoria's bestsellers, which is characterized by a shaped and curved column which supports the table top as a work of architecture with solid foundations.

This table is completed by a Lazy Susan revolving plate, ø70 or ø90 centimeters.
