Ductility and aesthetics

The chest of drawers Gong has a modern line, obtained thanks to the ductility of bronze. Like all Promemoria creations, Gong is characterized by soft finishes and extreme attention to detail.

Gong has a bronze structure, covered in fabric or leather. The knobs are truncated cones (for the fabric version) or in leather (handmade). The interiors are in oak. Available with hammered bronze structure.

The chest of drawers Gong is part of a large family of furniture bearing the same name.
