The magnificence of tradition

Joseph is a low cabinet available in various wood types. Its modular core makes it possible to obtain a piece of furniture suitable for all environments: from a few modules it is possible to build a huge piece of furniture. The silhouette was designed to obtain a great lightness effect: flared at the ends and with a top, it follows the curved lines of the furniture, creating a slight bezel at the edges. The design is completed by leather open compartments, repositionable glass shelves, bronze spacers and recessed handles. Joseph is available with a statuary marble top.
