## Design and features

Moka & Roka are two chairs created in 2008 by Romeo Sozzi's pencil. They have a beechwood structure, completely covered in fabric and leather.

The two chairs can be with or without armrests in hammered bronze and are distinguished by the hole in Moka's back.

Moka & Roka are available with different personalizations: back with leather profiles, hammered bronze cast armrests and handmade saddle stitches. They are available with armrests in a new contemporary finishing: black nickel.
