Light and matter

Nefertiti is a cabinet that belongs to the "Night Tales" collection, presented by Promemoria in 2016 to celebrate the moment of maximum intimacy of a home: the night.

Compact and light at the same time, Nefertiti has a wooden structure - available in different essences - with doors and shelves inside and on the sides in glass and top profile, base and shelves in bronze.

The handles are recessed, the bottom is in methacrylate and inside there is a LED lighting. Nefertiti is available in the high or low version.
