A minimalist work

Nila is an extremely contemporary dining table characterized by simple lines and dimensions of great impact. **The base is in medium smooth bronze** divided into elements that are separate from each other. **The top is available in various types of wood or marble.** The refinement of the sculptural base and the precious materials is combined with the essential lines, making Nila a minimalist work.

The dining table is part of the Nila family which also includes a console, united by the same design.
