Ceci n'est pas un object

Promemoria furnishing accessories are much more than just objects for the home: they are small accents of style that complete the vision that Romeo Sozzi has of everyday life.

Tovaglietta americana patchwork ("American patchwork placemat") is created by combining different colors of leather, just as in the palette of a painter the nuances are combined and mixed, creating worlds and scenarios where previously there was monotony.

The texture of the placemat, obtained from high-level craftsmanship processes, make this object even more precious.
